

SOFTWARE PURCHASE PRE-APPROVAL WORKFLOW

Illustrative process - fictional organization, requests, approval rules, systems, vendors, and records

PURPOSE

Coordinate business, budget, technical, information-security, privacy, and contract reviews before a new software purchase or trial is authorized.

SUBMISSION CHECKLIST & RESPONSIBILITIES

A tool-neutral reference for complete intake, clean handoffs, and accountable decision-making

MINIMUM REQUEST INFORMATION

☐ BUSINESS NEED

Problem to solve, intended outcome, alternatives considered, and accountable owner.

☐ USERS & ACCESS

User groups, administrator, access model, authentication, and support ownership.

☐ DATA HANDLING

Data categories, data subjects, sensitivity, storage, transfers, retention, and deletion.

☐ TECHNICAL SCOPE

Integrations, environments, implementation, testing, dependencies, and exit requirements.

☐ COMMERCIALS

Price, currency, billing frequency, usage assumptions, funding source, and total commitment.

☐ VENDOR DETAILS

Legal entity, contacts, product materials, security evidence, and relevant policies.

☐ CONTRACT DOCUMENTS

Order form, agreement, DPA, service levels, security terms, and incorporated links.

☐ TIMELINE

Target decision date, implementation date, dependencies, trial period, and renewal date.

☐ APPROVALS

Manager, budget, IT, security, privacy, legal, procurement, and any specialist approvals.

ROLE OWNERSHIP

REQUESTER / MANAGER

Complete need and accountable ownership

BUDGET / PROCUREMENT

Commercial review and purchase control

IT / SECURITY / PRIVACY

Technical and data-risk assessment

LEGAL / CONTRACT OPS

Contract review, approval trail, and records

PORTFOLIO ATTRIBUTION

Designed and created by Hans Bragas. Rebuilt with generic systems and fictional approval rules; no original company, vendor, ticket, or internal workflow data is reproduced. This coordination aid does not replace specialist review.
